### EAGLE

THE SPECIAL ONE AMONG ALL OPEN-ROOF, ALL-TERRAIN VEHICLES

---

#### EAGLE SOF COMPLETES THE RANGE OF EAGLE VEHICLES WITH AN OPEN ROOF VARIANT

GDELS` EAGLE SOF has been designed to mark the absolute peak of robust, durable, high mobility vehicles for special operations.

EAGLE SOF is based on the combat-proven, high-mobility chassis of the EAGLE 5 4x4 PATROL variant. Instead of an armored protected crew cabin, the open roof vehicle configuration with a useable payload of 3 metric tons provides almost unlimited flexibility on mounted armaments solutions, mission equipment and modular, mission-tailored protection kits.

With this full range mission spectrum, EAGLE SOF is responding to advanced demands of modern LRRP (Long Range Reconnaissance Patrol) and SOF (Special Operations Forces). The commonality of the vehicle chassis designed from the EAGLE 4x4 and 6x6 vehicle family provides significant advantages for the military users in terms of interoperability, advanced training and operations as well as cost reduced logistics and maintenance.
